

A SMALL BUSINESS WITH BIG EXPERIENCE

Procon is a small business that was founded in 1998 with a focus on providing collaborative solutions in program and project management. Procon offers a full range of management and support services for construction, space planning, business, technology, and real estate. We provide strategic and technical advice, management, and implementation support for some of the largest and most complex projects in the national capital region and nationwide.

OWNER'S REPRESENTATION

Project, Design, and Construction Management

Comprehensive owner's representation, including project, management, design management, and construction management services that will help you take your project from vision to completion while minimizing headaches and maximizing value. Focused solely on representing the best interests of the owner, Procon's construction managers make good projects better. Without strong owner advocacy even the most reliable architects and contractors can leave your project something less than you hoped it would be.

COMMISSIONING

Commissioning, Building Automation Controls, and Energy

Procon provides comprehensive Commissioning, Building Automation, and Energy Services to make sure your buildings and building systems are working the way they should be working. This means that everything works according to specifications and quality standards and that you are achieving and maintaining cost, process, and performance efficiencies.

TECHNOLOGY MANAGEMENT

Software and Technology Solutions

Expertise in planning, procuring, developing, and implementing technology solutions for collaboration and business process. From Building Information Modeling (BIM), Geographic Information Systems (GIS), Project Management Information Systems (PMIS), 360 degree reality capture and virtual inspections, to mobile and emerging technologies, Procon has the expertise to help identify the right process and tools, maximizing ROI, improving organizational efficiency, and streamlining process improvement for clients.

PROJECT CONTROLS

Cost Estimating, Scheduling, and Risk Management

Procon provides cost estimating, scheduling, and risk management services on design and construction projects across the country as part of our full-service CM solutions, and direct to A/E/C partners and owners. We have earned a reputation for flexibility, agility, and superior work products on large and small projects for education, government, and private clients.

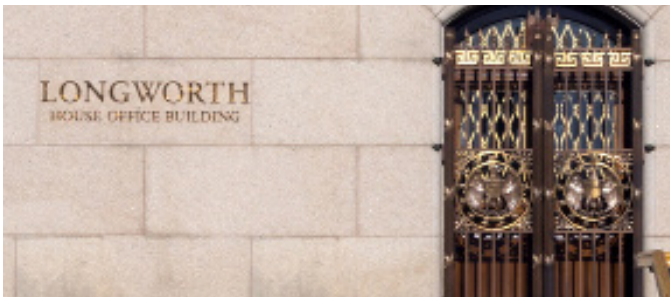

SAMPLE PROJECTS
